Volunteer registration is open for Raritan Headwaters' 35th Annual Stream Cleanup! In recognition of Earth Day, each year over 1,400 volunteers collect tons of trash and debris at nearly 70 cleanup sites along the Upper Raritan watershed streams and rivers throughout Hunterdon, Morris, and Somerset Counties.

Community volunteers including families, scout troops, students, individuals, church, civic and corporate groups come together in one morning to contribute to the protection of precious water supplies, wildlife and human health. In just three hours, you can make an impact in your community.
